

COMMERCIAL CASE STUDY

RENEWI OFFICES, HESPIN WOOD.

Project Summary

The team at Story Decorating group were asked to decorate both ground and first floor offices as well the staircase, together with Ground, first and second floors of recycling building, toilets, offices, canteen & control room.

Being big fans of the environment, we were fascinated to learn how waste in our local area was recycled. This plant is one of a number in Cumbria that recycles waste rather than sending to landfill. Due to its size and significance, offices are situated here rather than other sites and operations for other sites are coordinated from here.

We had to pay particular attention to detail on this project as the furniture was to be reused so we had to put the offices back together following redecoration at the client's request.

We handed a fresh and revitalised building over to a very happy client, resulting in the possibility of further works at other plants.
