

# HEALTHCARE CASE STUDY

# BURNLEY TEACHING HOSPITAL.

## Project Summary

The Story team were asked to carry out internal painting works to various areas including the operating theatres. The wall surface was sprayed with plaster and a new, specified Terrix paint system was applied, first by spray and finish coats by roller and brush.

The corridors had feature walls requiring a very steady hand for the intricate cutting in.

The site supervisors' relationship with the main contractor, client and other trades helped with the smooth running and completion of this well finished project that all of the team can be proud of.

This project was shortlisted for a judges visit at the Painting and Decorating Associations Premier Trophy Awards Competition but was put on hold due to Covid-19.
