

HOTEL & LEISURE CASE STUDY

BAY VIEW GARDEN CENTRE.

Project Summary

This garden centre went through an extensive redecoration including works to offices, the café, sales floor, toilets and the lobby to the outer garden centre.

The name of the project was brought to life with the café and its extensive views of the sea being redecorated throughout.

The building was previously a school which was transformed into a garden centre approximately 10 years ago. During this renovation, a new canopy was added.

Johnstones paints were used to achieve flawless finishes applied by brush and roller. We were also able to carry out spraying on this project and even finished the walls with spray which gave way for a faultless finish.

This was a fantastic project to be involved with due to the smooth and efficient running by the main contractor and a safe site to work on.
