

HOTEL & LEISURE CASE STUDY

HOTEL INDIGO, MANCHESTER.

Project Summary

This project included the refurbishment of a 150-year-old Grade II listed building & New build of the first rotunda style building in Manchester to create a Hotel, Gym & Restaurant. The 13 storey project was a very challenging but rewarding one and involved the use of more than 20 different paint colours. The Grade II Listed part meant working with existing and listed features such as irregular sized and shaped rooms, including cornice, mouldings, sash windows and ornate steel work both internally and externally.

The final project is of a very high standard and specification as commented on by the head project manager, client and staff working at the hotel. We have brought these two buildings together, new and old and we are very proud of the completed project.

“ I just wanted to take this opportunity to say thank you for your works at Hotel Indigo Manchester. The quality of workmanship and professionalism of your operatives and Site Management were exceptional. We have a delighted Client and Bowmer & Kirkland Directors, all of which have shared their appreciation of the end result with all their direct and non-direct parties. I look forward to working alongside your team on my next project. ”

Lee Powell Project Manager, Bowmer & Kirkland
